

## (一) Power supply side wiring diagram

~380V N insurance

## (二) Output side wiring diagram: terminal from the left

## (三) Site wiring diagram:

- ① burner      ② fan      ③ thermocouple
- terminal strip L N      terminal strip ① ②      terminal strip + -
- connecting box ① ②      fan L N      thermocouple + -

### (四) Note:

The burner on the top side is burner①, it's secondary burning, the burner on the below is burner②, it's first burning. The left thermocouple is ①, to test first burning room temperature, the right one is②, to test secondary burning room temperature.
