

## HP2416C

## 24 in 1 mux scrambling QAM modulator

## Outline

HP2416C is a high performance and cost-effective QAM modulator designed by Catcast. It supports 24 DVB-S/-S2/-S2X (DVB-T/-T2, DVB-C, ATSC, ISDB-T Optional) FTA tuner input, maximum 128 IP input through GE1 and TS input for re-mux through ASI ports. After multiplexing, scrambling and QAM modulating, it gives 16 non-adjacent carriers output and 16 IP (MPTS) output through GE2.

HP2416C is also characterized with high integrated level, high performance and low cost. It supports dual power supply (optional). This is very adaptable to newly generation CATV broadcasting system.
