

HPS358 1 Channel HD/SD Encoder & Modulator

Outline

HPS358 series encoder & modulator is CATCAST's consumer electronics which allow audio/video signal input in TV distributions with applications in home entertainment, surveillance control, hotel Digital Signage, shops etc.

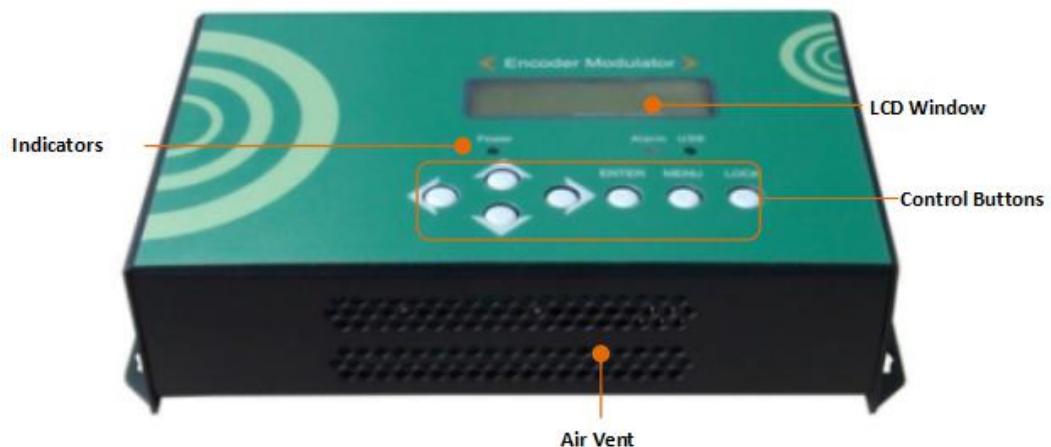

It is an all-in-one device integrating MPEG-4 AVC/H.264 encoding and modulating to convert audio/video signals into DVB-C/DVB-T/ATSC /ISDBT RF out.

The USB port is designed to record encoded video (TS) and save it in ts files in the USB Keys or Hard Disks, and then the ts files can be playback through the USB port. The ts files can be also generated on a computer with CATCAST's TS Creator.exe program.

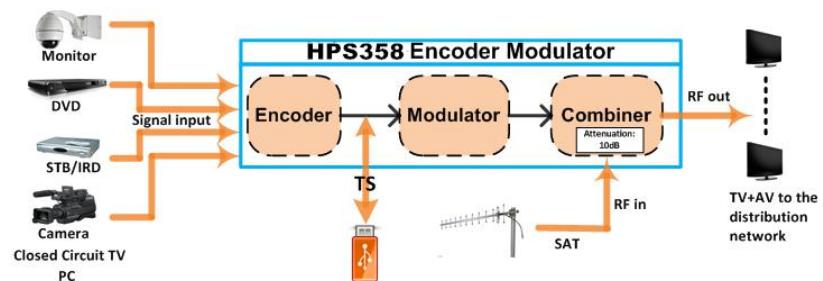

The signals source could be from satellite receivers, closed-circuit television cameras, Blue-ray players, antenna and a USB key or Hard Disk etc. Its output signal is to be received by TV sets or STBs etc.
